

Regent Rural Primary School, Sierra Leone

TGS helps in Sierra Leone

A group of employees of Toyota Gibraltar Stockholdings recently organised the collection and delivery of various items to a school in Freetown, Sierra Leone. The items were shipped inside a 4x4 vehicle which was destined for the Sierra Leone Red Cross and the local Red Cross staff assisted in the delivery.

The school was in need of stationery and three local businesses (Beacon Press, Trico Printers and Sacarello's Newsagents) donated a variety of goods. Apart from the donated items, the group also purchased large quantities of crayons, pens, pencils, books etc. and gathered other useful equipment which included a 37 inch TV and DVD player (donated by Hammonds TV), an electricity generator, a scanner, a printer, sport equipment and even a new computer!

The school is also used as a feeding point for

many needy children in the area and the items sent also included a microwave and many sets of plastic cutlery and plates.

The long term goal of the project is to help refurbish the school and fundraising activities will continue to support the donations received for the refurbishment.

If any individual or business is interested in donating vouchers for raffles or sponsoring the school in any way please contact Jimmy Bruzon on 57631000. ■
